Re: Samuel Liebermann

To Whom It Man Concern,

It is my privilege to recommend Samuel (Shmulik) Liebermann to your company. Shmulik has worked for me for over 3.5 years. He has proven himself to be highly motivated, extremely dependable and a very hard worker. Shmulik is proactive worker who will monitor his platforms to prevent disruptions.

As platforms engineer, his responsibilities included data analysis for reports, monitoring, troubleshooting and capacity tracking various high availability platforms: OTA (On the air applications), JAVA application download, EMC storage manager, MMS (multimedia message service) and Voicemail.

As a developer he was responsible to develop scripts for monitoring and reporting, a task he performed in a most outstanding manner.

I highly recommend Shmulik to any company, I predict that he will, in short time, become a valuable asset.

Please do not hesitate to contact me for further information.

Best Regards,

Shmuel Gamliel.
